clean

January 12, 2017

Abstract

This task removes a number of intermediate files created by the diverse `esas`
components that can be deleted when all of the processing is complete.

1 Instruments/Modes

Instrument	Mode
EPIC	Imaging

2 Use

pipeline processing	no
interactive analysis	yes

3 Description

clean removes a fair number of intermediate files created by several tasks belonging to the `esas` package.

Warning and requirements: *clean* is part of the package *esas*, integrated into SAS, but (still) limited to work within *esas*' data reduction scheme. This is specially true wrt files structure and names.

4 Parameters

This section documents the parameters recognized by this task (if any).

Parameter	Mand	Type	Default	Constraints

5 Input Files

6 Output Files

7 Algorithm

8 Comments
